

AMENDMENTS TO THE CLAIMS:

This listing will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (currently amended) A process enabling a digital image to be displayed on a terminal equipped with a keyboard and a display screen, the process comprising the steps of:
 - a) composing from the keyboard of the terminal, an electronic message including at least one identifier of a photographic support comprising a plurality of thumbnails, each of said thumbnails being assigned a thumbnail identifier;
 - b) sending from the terminal, the electronic message composed in said step a) to a messaging server, said messaging server being identified by a unique telephone number;
 - c) automatically transmitting said electronic message to a processing server;
 - d) automatically processing, from the processing server, the electronic message sent, in order to select a set of digital images corresponding to the thumbnails of the identified photographic support and included in the electronic message;
 - e) automatically transmitting to the terminal a notification of the availability of the set of selected digital images;
 - f) automatically displaying on the screen of the terminal the notification of the availability of the selected digital images;
 - g) validating, from the terminal, a display request for the available selected digital images, enabling the display on the terminal of the identifier of each of said thumbnails of said available selected digital images on the screen;
 - h) selecting at least one thumbnail identifier of said thumbnails, and validating the at least one thumbnail identifier selected;
 - i) automatically transmitting the available digital images image

corresponding to the at least one thumbnail identifier selected to the terminal;
and

j) automatically displaying ~~said~~ the available digital images image
transmitted in step i) on the screen of the terminal.

2. (previously presented) The process according to claim 1, wherein, during said step b) an automatic invoicing is further carried out, the value of the invoiced sum being a function of a content of the electronic message composed at said step a).
3. (previously presented) The process of claim 1, wherein the display request comprises activating, from the keyboard of the terminal, a universal resource location (URL) mentioned in the notification of availability.
4. (canceled)
5. (previously presented) The process of claim 1, such that in the transmission of a plurality of digital images to the terminal, said digital images are automatically displayed successively in a display sequence whose frequency can be programmed.
6. (previously presented) The process of claim 1, such that in the transmission of a plurality of digital images to the terminal, said digital images are displayed successively according to a request manually performed from the keyboard of the terminal.
7. (previously presented) The process of claim 1, wherein the photographic support comprises an identifier located in a zone of said photographic support.
8. (previously presented) The process of claim 1, wherein the photographic support is a photographic index comprised of photographic paper.

9. (previously presented) The process of claim 1, wherein the photographic support is a photographic film strip.
10. (previously presented) The process of claim 1, wherein the identifier of the photographic support is placed on a material support distinct from said photographic support.
11. (previously presented) The process of claim 1, wherein the terminal is a portable terminal.
12. (previously presented) The process of claim 11, wherein the portable terminal is a cell phone.
